Topics Discussed:

This week, we discussed selecting 2-3 design patterns that are present in our project, some ways to present them, and how to justify their inclusion. We discussed designing one class diagram for each selected pattern, resulting in a total of 2-3 class diagrams. This will help in demonstrating how these patterns are implemented within the overall system architecture.

Decisions Made:
After meeting, we decided to select these design patterns that are present in our project: Chain of responsibility, Observer, Factory, Builder and Proxy. We decided to present them, and justify their inclusion.
Additionally, we discussed designing one class diagram for each selected pattern, resulting in a total of 2-3 class diagrams. This structured approach will provide clarity on the design patterns employed in our system and how they contribute to the overall architecture.

Tasks Assigned:
